

Tallahassee Genealogical Society

The Tallahassee Genealogist

Cumulative Surname Index

Volumes XXI through XXXIII

Compiled by

Walter Curtis Jants

Comments

Society President Jay P. Collins issued a call during the July, 2015 meeting for volunteers to index the names of several volumes of the Society quarterly publication, *The Tallahassee Genealogist*. I told Jay and my wife, Joanne, that I would take a look at the project and *maybe* do a few issues. This started me down a long path that resulted in this publication. I told Jay at several subsequent meetings that I must have been crazy to become involved, and Joanne readily agreed.

I strongly encourage any person interested in the history of the United States and particularly Florida to read *The Tallahassee Genealogist* back issues. It offers more than a narrow focus on the people of North Florida and preserves many accounts of events not likely to be found in history books. Fascinating insights into the daily lives, deaths, and customs of people throughout the United States and other countries will be found in its pages along with hints on research and preservation of family documents, photos and other mementoes.

This compilation of surnames that appeared in *The Tallahassee Genealogist* Volumes 21 Number 1 through Volume XXXIII Number 4, a total of forty-six issues, is the third in a series begun by Carol Cox Bouknech, (Volumes 1 through VI) and continued by Richard R, Sherwin (Volumes VIII through XX).

The forty-six issues were downloaded from the Tallahassee Genealogical Society web site, printed, and read in detail. A Dell Inspiron-1545 laptop computer running Windows 7 and Excel 2007 was used to catalog found names. The names were typed into a separate Excel workbook for each Volume with an individual worksheet for each numbered issue. The worksheets were then consolidated in a worksheet and alphabetized. Obvious duplications and transcription errors were then resolved. Finally, the individual volume lists were transferred to a single master workbook, alphabetized by name, and the index pages were built by copying and pasting the lists into formatted pages. Each page includes two sets of four columns, each set including a column with the surname, first name and title, a second column for the Volume, a third column for the Issue and a fourth column for the pages the name appeared on. Separate entries were used for each person whose name appeared in more than one quarterly publication. Names of authors of articles were not cataloged unless the story had an autobiographical nature or the author's identification was of historic or genealogical interest. Names of Society officers, guest speakers, authors of publications, place names and business names were not routinely included, nor were names used to illustrate historic naming conventions.

The Tallahassee Genealogist Cumulative Surname Index, Volumes XXI-XXXIII

Copy and paste was used to transfer lengthy name lists from several issues but proved slower, more tedious and error prone than keyboarding the names one by one. Colored paper stock was apparently used to publish Volume 21 Number 1 through Volume 30 Number 2. Copy and paste transferred the grey tone shading of the downloaded .PDF copies to the Excel workbooks and the software was not able to remove the grey tone background so these entries were discarded and entered manually. Keyboard entry of the names and related information proved the most efficient method of collecting the information.

Times New Roman Font size 10 lettering was selected for this publication to facilitate ease of reading and maximize the number of surname entries per page. Smaller fonts such as 9 and 8 were tested and allowed more entries per page but proved difficult to read. Larger font sizes reduced the number of surnames to one column set per page resulting in more than double the number of pages. Readers will note that a small number of surname entries "wrap" to a second line and a blank line is created between entries in the adjacent column of names. The Excel edition used for this project did not allow insertion of an extra set of Name, Volume, Number and Page spaces in these blank areas to facilitate continuous flow of the listings.

The forty-six issues are listed in the accompanying "The Tallahassee Genealogist Cumulative Surname Index, Volumes XXI-XXXIII: Volume and Number List Notes". Quarterly issues were not prepared for several years, and the notes provide insight into volume, issue and pagination problems that were encountered during this project.

Titles, honorary and personal, and military ranks have been included as recorded in The Tallahassee Genealogist. Users of the Index may refer to Internet sources for definitions of military ranks and abbreviations, particularly for United States Navy and Coast Guard Military Occupational Specialties.

The Tallahassee Genealogist Cumulative Surname Index, Volumes XXI-XXXIII
